Gen AI Hackathon 2026

Smriti-setu AI

Bridging the Health-Care Gap
for Bharat's Elders.

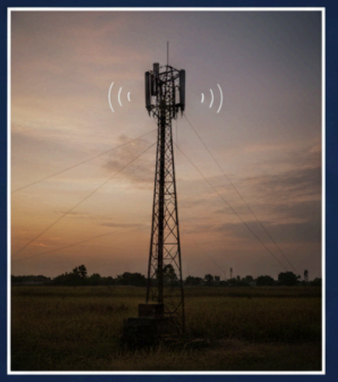

“140 million elders”, in India face a choice:
complex tech they don't understand,
or health care they can't access.
“We change that today.”

Presented By:
Sanobar Shaikh

The Problem

The Problem (The “Pain”)

Connectivity

60% of rural Bharat lacks stable internet for real-time AI

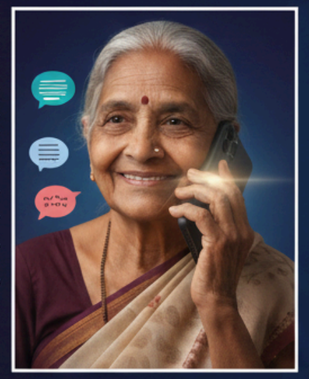

Language Barrier

Medical jargon is intimidating; 22+ local languages are ignored by standard apps.

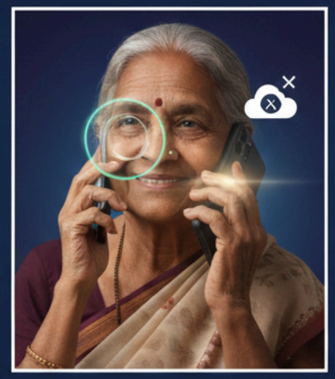

Care Gap

Distant children live in constant anxiety about their parents' unmonitored wellness.

Our Solution

Voice-First & Vernaclurar

Offline-First Screenings

Care-Connect Dashboar

Voice-First & Vernacular: A natural-language interface that speaks the user's dialect.

Offline-First: Critical medical screenings (vision/vocal biomarkers) processed locally on the device.

Care-Connect Dashboard: A "Wellness Index" that keeps families connected without being intrusive.

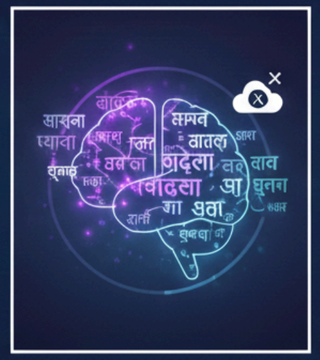

Smirti-Setu AI

Technical Architecture (The "Secret Sauce")

Edge Intelligence

LiteRT (TensorFoW Lite) for on-device bioentric analysis

Generative Core

Quantized Gemma-2B / Llama-3-Small for localized offline dialogue

Tenmer Ltle | Lume-3ep

Agentic Workflow

Autonomous monitoring & 'Care-Connect' alerts

Technical Architecture

- Edge Intelligence: LiteRT (TensorFlow Lite) for on-device biometric analysis.
- Generative Core: Quantized Gemma-2B or Llama-3-Small for localized offline dialogue.
- Agentic Workflow: Autonomous monitoring that triggers "Care-Connect" alerts only when necessary.

SMRITI-SETU AI

BY SANOBAR SHAIKH

Thank You Very Much!

"Distance should never delay care.
Let's build Smriti-Setu together".
